(Over for Testing Process)

(July 2007)

Brunswick County
HYDRANT FLOW TEST APPLICATION

Who needs to apply for flow test information?

- Firms that design landscape irrigation systems.
- Engineering firms that design water systems for new development.
- Firms that design fire protection systems for buildings.

When and how should I apply for a flow test?

- Three weeks before you need the results.
- Complete the other side of this sheet and submit it to Customer Service.
- Submit the fee (\$200) in check form to Customer Service made payable to Brunswick County Public Utilities.

How long does it take to get the results of the flow test?

- If we have data from a recent test that was performed at or in the vicinity of your site, we will provide you with those test results. A test that was conducted within the past **2 years** will be considered a current test unless significant changes have occurred within the transmission system.
- If a new test is required, it will be scheduled and conducted in the order it was received by the County. You will receive your test results within **three weeks**.

Can we do the test ourselves?

- Yes, however, a Hydrant Flow Application is required so that the County can arrange to witness the test. It will take up to three weeks for the test to be scheduled for witnessing by the County. After conducting a private test, please forward a copy of the test's results to the following address:

***Hydrant Flow Data
Brunswick County Public Utilities
PO Box 249
Bolivia, NC 28422***

How will I be notified of these results?

- You will be notified after the tests results are calculated and verified. Typically, results are sent via email or fax, but they can be sent in the mail if desired.

Do not hesitate to contact us if you have any questions. Please contact the Brunswick County Public Utilities Customer Service Department at (910) 253-2655 if you have any questions.
